The roller brake tester MBT 1000 EUROSYSYSTEM is designed for the brake testing of two and four-wheeled vehicles such as motorcycles, trikes and quads with axle loads of up to 1 t. Thanks to the short distance between rollers, it is also especially suitable for the inspection of small two-wheelers. Its modular MAHA design allows for an optional motorcycle clamping and holding device for front and rear wheels, the clamping jaws of which ensure easy testing that is gentle on the rims.
